

# EOR End Dump Retrieval

TS04-001 EOR End Dump Retrieval 3PT - Single Row

TS04-002 EOR End Dump Retrieval 3PT - Double Row (between avenues)

**This equipment was designed for the vegetable grower who does not reuse drip tape. The extractor applies an adjusted constant pull to several lines of tape forming a dense ball of used drip tape. The tape can easily be loaded into a container for recycling or disposal.**

- **Easily extracts from the ground surface**
- **Reduces hand labor to move tape**
- **Places tape in a pile at the end of the field**
