

"Genie" Lay Flat Retrieval Machine

LF0801-001

3-PT Front/Rear Layer Retriever

LF0601-001 Self Powered Genie

Operational Features

No lifting required

Machine hydraulically loads and unloads full reels of hose.
Can handle 4", 6", & 8" layflat.

Safe to operate

No lifting means operators are protected from injuries caused by lifting rolls of layflat that can weigh upwards of 300 pounds.

The "Genie" is equipped with multiple safety features to protect the operator during mobile and stationary operation.

Simple to operate

All retrieval controls are clearly marked and accessible during both mobile and stationary operation.

The Andros “Genie” is a self-propelled retrieving machine that is ideally suited to retrieve and layout hard to handle materials such as layflat hose. Used in conjunction with our new 36-inch heavy duty Agri-LF-Spool, all types of layflat hose can be safely and efficiently retrieved. Single person operation for retrieval and layout.

Typical method of storage. Retrieving on the layflat spool.
Layflat Spool sizes:
4”, 6”, & 8”

Spools are designed for easy handling and storage.
