

New Universal Retrieval Head for Disposal

As an Andros dealer you can now order Retrieval Heads to meet your customer's exact requirements.

The Retrieval Head shown here and described by part number above, represents a unit typical of a user who wants to retrieve tape from the field for disposal. The trash spool shown in the picture can be quickly removed when the user wants to retrieve tape onto Agri-Spools. The retrieval head can be mounted on a trailer or a toolbar and operated from the end-of-the row or over-the-row. Trash spool removes easily to accept 18-inch or 24-inch Agri-spools to retrieve for reuse.
